| Tajvir Ahmed Sejan | 18-36151-1 |
| K S Subhan Munim | 18-36171-1 |

## Description:

Now-a-days, tutors have to face a lot of difficulties in search of a tuition. In tuition pages they also need to pay fees for the membership that doesn't give any guarantee that they will get a tuition. Whereas , parents want private tutors to help their children with better skills to perform better in exam. So our aim is to build an application where Users who are searching for tuitions and those who want tutor for their children will be provided. In our project there will be available details of tuitions, ,tutors and students. User can search for best quality tutor and tuition according to their location. To access it user have to create an account of their own and login before enrollment. Students/Guardian user can edit and update their profile and post tuition for tutor according to their requirements. They can search for tutor by their location. There is also a payment system of bkash and cash in pay. They can give rating and review to the Tutor. Tutor user can also edit and update their profile. They can search for tuition in their preferable location. They can contact with the guardian and can also negotiate their salary. This website can help both people who are in search of tuition and also those who are in search of tutors. It is very a user friendly websites.

Background Study:

For reference the website we studied is https://caretutors.com/

## For Using This Applications You Need To Install:

1. Microsoft Visual Studio
2. SQL Server Management Studio

# Requirement Analysis:

There are four types of users here. They are
1.Admin
2.Tutor
3.Student
4.Guardian

# Feature List :

In this project the admin has the following features :

- Do registration
- Login
- Crud User
- Manage Tutor
- Manage Student
- Manage Guardian
- View Details
- Log Out

In this project the Tutor has the following features :

- Do registration
- Login
- View Profile
- Edit & update profile
- Search Student
- Make Tuition Advertisement
- Became Premium Tutor
- Log Out

In this project the Student has the following features :

- Do registration
- Login
- View Profile
- Edit & update profile
- Search Tutor
- Hire Tutor
- Log Out

In this project the Guardian has the following features :

- Do registration
- Login
- View Profile
- Edit & update profile
- Hire Tutor
- Log Out

## Common Features:
- Home Page
- Login/Logout
- Registration

## System Images Against the specifications:

Home Page

# How to Use:

To access our application user need to register first & login to view there profile.

Four user details and their username & password:

1. Admin (username: NABIL, password: 7784)

   An admin can view his own profile (he can update his profile) as well as find the tutor, student and guardian. He can add the employees.  He can see and update tutor, student and guardian information. He can crud users. He can give instructions to the tutors.

2. Tutor (Username: RANU, Password:1234)

   A Tutor can view his own profile as well as he can edit his details. He can get instructions from the admin.

3. Student (Username: Tajvir, Password:123)

   A student can view his own profile and update his profile. Student can search for tutor & hire tutor from tuition board

4.Guardian (Username: Munim, Password:1235)

   A guardian can view his own profile and update his profile. Student can search for tutor & hire tutor from tuition board.

# Impact of this project:

Now a days, its being hard for tutors to search for tuition. Specially students of college and university are seems to search for tuition everywhere .  Along with that parents are also being worried of searching tutor for their children. Our project can solve the problems of both tutors and parents. It can provide them easy way of searching and contact with each other. Parents won't have to worry to search for expert tutors where they can find them easily in our website. They don't have to request for tutors or for tuitions to others. They can find it here with all proper details and without any hassle of search anywhere. It is a great impact for both the tutors and students.

## Limitations:

No payment system

## Future Improvements:

We tried to use constructor in profile editing that shows result via labeling.
